

This thing is very small.

It is so small that you cannot see it with your eyes.

It is so small that you cannot see it with a microscope.

This thing is very important.

If you look at you table you can see more then a trillion of this thing.

This thing works together with many friends.

This thing move very quickly.

Some people think that this looks like a solar system.

Some people think that this thing is able to travel in time.

The elements are made of these things.

Elements are things like gold, silver, and copper.

These move very quickly and in circles.

Everything is made of these things.
